Project Stage: Design Development

Square Footage: 17,000 sq. ft. of retail with 600-650 parking spaces

PWA is working with Walker Parking Consultants/Engineers, Inc. on the design of this 9 tier parking structure to be located in downtown Columbia, Missouri. The 3-dimensional modeling of the design is a tentative proposal that includes red brick on the garage's lower half and concrete above with about 17,000 square feet of first-floor rental space.

The parking garage will have about 600 to 650 spaces and will provide about 50 spaces of secure parking for Columbia police vehicles. The structure will be located on Walnut between Fifth and Sixth streets and will cost an estimated \$12 million to \$15.5 million
